These discussions have revealed a growing sense of division between developers on one side and users end on the other. Sandven, Kristoffer (20 July 2009). April 24, 2013. With a greater one In the site navigation and a more user-friendly means to change the content of the Joomla 3.x has become the most popular versions of the CMS in the end to carry out all previous obsolete versions. [28] In March 2014, afterwards Community Feedback and a presentation from the production leadership team, a recently established OSM card has been approved to change the license for the picture from GPLV2 to LGPL. [29] [30] Although the proposal has only influenced the license and not the CMS, the decision sparked a fierce debate within the Community. [31] [29] In the end, the framework has not adopted LGPL and is still licensed under GPLv2. [32] In August 2014, the Joomla CMS development team released a plan for new version versions. [33] Towards the end of 2014 - three years after inviting feedback on ways to reorganize the project [23] and with Joomla 3.x in its fourth minor revision - the community discussed the structure of the leadership structure. [34] Eddie, although it is no longer and active contributor to the project, claimed that the code for Joomla 3.x was "too fat and heavy to maintain with the current level of contribution"; Recommended MothBalling The current CMS series and will develop a less bulky Joomla 4.7 May 2007. In his welcoming speech to J and beyond the President of the OSM Brian Mitchell recognized the impact of the global crisis on Joomla. In July 2009 of that year, the Joomla project announced a restructuring of its management: a new team of Leadership Joomla replacing the main team that originally brought the project. Filed by the original February 9, 2015. Recovered on 9 December 2020. ^ to B the technical requirements Joomla ^ "Joomla!" Extensions Directory". Due to a PHP requirement modification in Joomla 3.3, a support for extended security was provided for 3.2 for six months after version 3.3. [74] 3.3 [75] 30 April 2014 February 2015 Improvement of your password hashing, microdate support, removal of dependencies to Mooools. Recovered on 5 December 2020. 26 August 2019. Models are installed as extensions to Joomla and can be customized with the override source code and / or CSS. [91] The standard models are included to the installed later. The extensive security reviews were distributed in October 2015 with the release of V3.4.5. 3.5 [80] 21 March 2016 July 2016 Amendments to the Admin interface (including a certain ability to drag the drag images). Joost.Blog. Volunteers.joomla.org. ^ "Joomla! Project Roadmap". JXTeded solutions. Shortly after the release of Joomla 2.5, the work was underway on the Joomla 3.X. Joomla 3.X. Joomla 3.X. was focused on websites for devices mobilized on the front-end, as well as a more intuitive back-end. ^ See Joomla! CMS versions for more information on the state of the version. Essential Joomla.
